Schumacher Guards

Guards

In the last decades, two types of double guards became dominate in the market: the forged guards and the Schumacher steel guard.

What makes the SCH Easy Cut steel guard so special? The SCH Easy Cut guard is manufactured using a special alloy steel. A subsequent special hardening process gives the guard extremely high hardness, durability, and wear life.

Another advantage is the much higher vertical and lateral strength of the guard.

No guard lips break off; guards don't bend.

The angled cutting edges of the guard hold the crop material better, resulting in a cleaner cut and a better flow of the material. This also results in less power needed to cut the material.

Guard Features

- ✚ Quality spring steel material
- ✚ Special hardening for extremely hard & wear resistant surface, resulting in long wear life
- ✚ Features two cutting edges
- ✚ Bolted top & bottom gives protection from impact from all sides
