

Pro-Drive Module V

Pro-Drive vertical version works with an integrated 90° angular gearbox, with the drive force transferring from the vertical to the horizontal direction. The connection to the combine harvester is performed via v-belt or drive shaft.

The Pro-Drive vertical drive maintains an 84.6 mm stroke and is used for all conventional cutting systems.

Accessories Pulley

Pro-Drive vertical versions are equipped with pulley, which includes:

- Diameter of 180 – 240 mm
- Variants for various v-belt profiles
- Flange mount
